On September 1, 2011, Alberta's Distracted Driving Law came into effect.

As part of this regulation, you can no longer use your handheld phone when driving.

Ask your Graybar Canada representative about which hands free products will ensure you comply with the new law while staying connected to your business at all times.

We have a wide variety of hands free devices including the Jabra Cruiser2:

- Superior sound for hands-free calls in the car
- Multiuse™ - connect to 2 Bluetooth® devices simultaneously
- Voice Guidance – Caller ID, battery status, set-up and more
- Dual microphone technology for excellent sound
- No installation needed – just clip it onto the sun visor
- Connect it to your car radio with the FM transmitter and transmit your music and calls to your car stereo (A2DP)

\$95.00

While quantities last.
