Automation Training Seminars for 2011

Register for an Automation Seminar nearest you - dates and locations inside and contact information on the other side of this brochure.

Vijeo Designer

This hands-on seminar will give you a solid understanding on how to configure and create applications for use with the Magelis series of HMIs. Vijeo Designer is flexible enough to deploy locally or internationally with its multi-language capabilities. Other features include:

- Full Animations
- Java Script
- User Customizable Resources
- Web Gate Remote Access
- Sharing of Applications Between Terminals
- Instantly View Processes
- Transfer Recipes and Logs for Variables

March 16	Mississauga	September 14	Timmins
April 27	Markham	September 21	Sault Ste. Marie
May 18	Windsor	September 28	Sudbury
July 14	Hamilton	October 14	Kitchener
July 20	Sarnia	October 24	Niagara Falls

Industrial/Automation Hardware

This seminar will discuss the key features of our newly released products, some of the common applications they are used in as well as a very general technical overview of each product featured. Products featured will be from our Industrial and Automation offering so there is something for everyone! We will also be presenting a general road map of our upcoming product launches.

April 20	Windsor	October 19	Markham
May 4	Kitchener	November 16	Sault Ste. Marie
May 18	Mississauga	November 19	Timmins
May 31	Hamilton	November 23	Sudbury
June 8	Niagara Falls		

Vijeo Citect

This Vijeo Citect Seminar will introduce you to using an HMI/SCADA system. You will learn how to build a small project, configure dynamic graphics, create alarms and trends and then run your project like a real plant!

Once you have completed this seminar you will understand and work with:

- Basics of an HMI/SCADA project
- Configure Clusters, Tags, Graphics
- Alarms, Trends, Security, Admin.

Contact your local Graybar Canada Representative for Vijeo Citect training dates.

Unity Pro

A single software package covering the entire Modicon product line since 1969 including IEC61131-3 and 984LL programming, debugging and operation of the complete family of programmable controllers. It opens doors to a complete range of new functions for improved productivity and collaboration. With the addition of the 984LL, migrations from any Modicon platform are possible with a simple conversion. Your software investment is maximized, training costs are reduced and you benefit from unequalled development and compatibility potential. This seminar takes you through the basics of configuring a Programmable Controller using Unity Pro Software.

- Tasks and Sections
- Program Logic
- Diagnostics

April 13	Mississauga	July 27	Kitchener
May 4	Timmins	July 29	Niagara Falls
May 11	Sault Ste. Marie	August 24	Sarnia
May 18	Sudbury	October 11	Hamilton
June 16	Windsor	November 9	Markham

Drives

This seminar will introduce you to Altivar AC drives, Altistart soft starts and TeSys U-Line motor starters. Some of the features you will be introduced to are the simple starting and commissioning of a device through the device interface, and introduction to PowerSuite software which will include creating and modifying configuration files on a PC as well as working with the monitoring and alarming features. With this we will also be presenting a roadmap of our new and upcoming additions as well as a brief introduction to the newest SoMove software.

March 30	Kitchener	October 11	Sudbury
April 27	Mississauga	October 27	Windsor
August 4	Niagara Falls	November 10	Hamilton
September 21	Markham		

SoMachine

SoMachine is part of Schneider Electric's new flexible machine control platform designed specifically for OEM builders. It simplifies development and commercialization of your machines by incorporating four hardware platforms in a single environment. It leverages a library of tested, validated and documented control function blocks that are tested to comply with local and national regulations giving you the ability to simplify the integration of components up to 50% faster.

- Automation Architecture Templates
- Smart Coding
- Commissioning Screens

Contact your local Graybar Canada Representative to pre-qualify for these seminars as they are only being offered to OEM's and pre-qualified customers.
