

## GRAYBAR CANADA WORKS FOR YOU

Graybar Canada's experienced sales and customer service representatives are skilled in sourcing Automation, Comm Data, Electrical, Lighting, Oil & Gas, Security and Utility products. Our highly skilled Technology Solutions Specialists can help you determine which products are the right fit to complete your solution. We can quickly locate hard-to-find items and ship large quantities for next day delivery. We can query our national inventories to more than 28 stocking locations in Canada. Graybar Canada's product sourcing and delivery is fast, convenient and reliable.

edgeBOX is purpose built for small and medium businesses (SMB) so you can:

- Get sophisticated communication capabilities
  - Broadest range of voice, data and IT services
  - Telephony, web server, e-mail server, faxmail, security, file and printer sharing and much more
  - Value-added applications for collaboration, website management, etc.
- Dramatically simplify your voice and data network
  - Replace up to 8 devices with a single appliance
  - Easily manage your day-to-day operations
  - Peace of mind guarantee with 24/7 support
- Reduce ongoing cost by over \$10,000/year when compared to traditional solutions
  - Get started for as low as \$2500 USD
  - Operational costs reduced by over 60% due to simplicity, power savings and low IT support
  - Comprehensive support services at a nominal cost

edgebox

Model	Hardware	REC# of Users
SOHO Appliance	Set-top box	1-10
Office Appliance	Set-top box	10-40
Business Appliance	2U rack-mountable	40-100
Enterprise Appliance	High-end, 2U rack-mountable	100-300
Hardware Options	WiFi; ISDN BRI; PRI Single, dual or quad span; FXS/FXO up to 12 ports per card	

Aastra's suite of SIP telephones offer the most complete SIP telephone portfolio in the industry. Style, mobility options and the inclusion of expansion modules all add up to choice, flexibility and expandability in a full range of carrier/enterprise grade quality SIP telephones. From the basic functionality of a courtesy phone, to a large screen graphical display phone, Aastra has you covered.

All Aastra SIP phones offer:

- Extended XML capability embedded browsers to support productivity enhancing applications
- High level integrated interoperability with major IP Telephony platforms
- Full duplex speakerphones with wide band audio support
- Up to nine call appearance lines
- Intuitive, user friendly screen menus and interfaces

A1751-0131-10-55	Aastra 6751i Series
A1753-0131-10-05	Aastra 6753i Series
A1755-0131-10-05	Aastra 6755i Series
A1757-0131-10-05	Aastra 6757i Series
A1758-0131-10-05	Aastra 6757iCT Series

MOBOTIX is introducing a new Door Communications product range, based on the international VoIP/SIP Video Telephony standard. **Available September 2009**

- The doorbell triggers a network connection to a video telephone or PC.
- Superior overview enabled by the 3.1 megapixel hemispheric camera with vPTZ
- Automatically stores all activities outside the door with sound (triggered by doorbell, motion sensors or electrical contacts)
- Power supply via network cable or (already existing) bell wire
- Precisely matches the modular door intercom installation system from SIEDLE
- Modules can be integrated, such as: doorbell buttons, motion sensors or lighting controls

Part Number	Description
MX-DS-24	Video IP Door Station

Our switches for small to medium businesses provide secure WAN connectivity with cost-effective Gigabit and Fast Ethernet speeds. We offer stackable switches to allow you to build a virtual chassis. Our PoE switches support access points, IP cameras, VoIP phones and other IEEE 802.3af powered devices.

Part Number	Description
AT-FS708/POE-10	8-port 10/100 unmanaged Power Over Ethernet Switch W/I SFP
AT-GS950/8POE-10	8-port Gig WebSmart POE switch with 2 SFP
AT-FS750/24POE-10	24-port FE Websmart Switch (12 POE capable) + 2SFP/Tri Speed Copper Combo ports
AT-8000/8POE-10	8-port 10/100TX POE managed switch with 1 combo 10/100/1000Base-T port or 1 SFP slot (unpopulated)
AT-8000S/24POE-10	24-port managed PoE stackable Fast Ethernet switch with two combo SFP slots
AT-8000S/48POE-10	48-port managed PoE stackable Fast Ethernet switch with two combo SFP slots
AT-8524POE-10	L2+ POE switch with 24-10/100TX ports plus 2 expansion slots (US AC power cords)
AT-8000GS/24POE-10	24-port Layer 2 Power over Ethernet switch with 24-10/100/1000Base-T ports with 4 combo SFP slots (unpopulated)
AT-8624POE-10	Layer 3 switch with 24-10/100TX ports plus 2 expansion slots (US AC power cords)

Take your pick from a multitude of stereo and mono headsets - designed to get the most out of your PC audio experience. Ideal for voice and video chat, PC-based IP telephony, interactive training and even gaming or music. In fact for just about anything you might want to listen to from your PC.

Part Number	Description
GN9330e USB	Wireless noise-canceling microphone for reduced background noise
GN2000 USB	Hard-wired USB for PC-based IP telephony
A330	USB Dongle for PC based IP telephony
GN2000 IP	Robust design for day-after-day durability
GN2100 IP	Excellent Hi-Fi IP telephony (80 - 15,000 Hz)
GN2100 USB	Hard-wired USB for PC-based IP telephony

With the introduction of the ORiNOCO 802.11n product line, Proxim Wireless is providing the first 802.11n solution to achieve the industry's highest throughput and range at half the price of existing 802.11a/b/g networks. Proxim's 802.11n solutions provide the industry's highest performance, easiest use and most cost-effective 802.11n networks for organizations of all sizes. With the ORiNOCO 802.11n product family, Proxim has designed the first complete 802.11n solution that overcomes the deployment challenges faced by competing products. The result is an 802.11n solution that enables customers to quickly, easily and cost-effectively deploy the highest-performance 802.11n network available.

Part Number	Description
75932	ORiNOCO AP 8000 802.1 In Access Point Dual Radio
75935	ORiNOCO AP 800 802.1 In Access Point Single Radio
8494-WD	ORiNOCO 802.11 a/b/g/n USB Client Adapter - World

Power over Ethernet (PoE) has redefined the way organizations think about powering network components, but it requires data center managers and facilities managers to reconsider the way power protection is extended to VoIP devices. The right uninterruptible power system (UPS) for a VoIP infrastructure will be governed by many factors that determine the right topology, power rating, battery runtime, form factor and remote UPS management. Eaton's extensive Powerware product offering can deliver the best power solution for you.
