Let's talk about how Graybar Canada can help you drive efficient, safe operations.

## Automation and Control Product and Solutions

Ontario Region

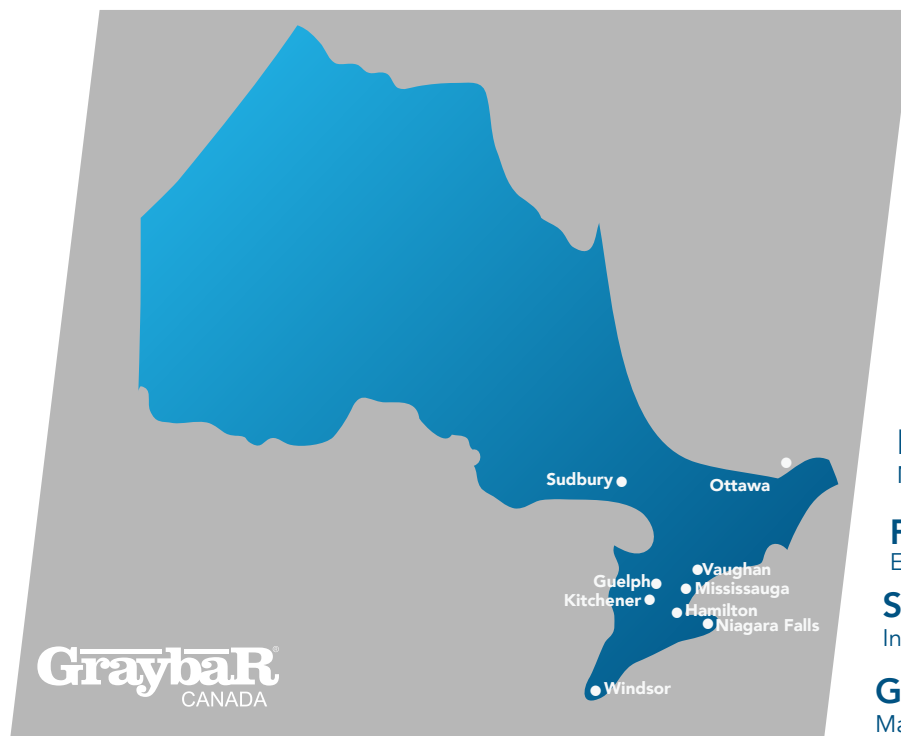

Graybar Canada Ontario Division employs a skilled team of specialists to maintain the highest level customer support and service. Each team member is factory trained on the latest products. We use a team approach to ensure that we can respond quickly to customer requests. When customers [contact us](#) we strive to respond in one hour or less.

We believe that our customers deserve to have product readily available, for that reason we maintain a centrally located warehouse with 1 Million Dollars of PLC, Drive and HMI inventory. We are very proud of the fact that we are able to ship complete systems from Inventory.

In the changing world of Automation customers need to be informed about the latest products and how to apply them. We schedule several 1/2 day and 1 day hands on seminars throughout the year. We provide the products and laptops to facilitate learning.
