Covio

Architectural LED Cove Lighting

EAT•N

The CoviO enables continuity in illumination from indoor to outdoor spaces such as in the coves in both the outdoor portico and the lobby without socket shadows as well as the illumination of the roof line.

CoviO™

Architectural LED Cove Lighting

iO revolutionized the architectural lighting market when it launched in 2007 with a commitment to all LED products, tight optical control, small size and high performance fixtures.

CoviO builds on this rich history with a new integral driver luminaire which delivers three output options ranging from functional illumination to a soft glow in an easy to install, exterior rated fixture which enables long runs of consistent illumination.

An Elegant Package Designed to Perform

The CoviO delivers a comprehensive range of high performance features with flexibility and easy installation in mind. Its compact construction, low energy consumption, and remarkably powerful lumen packages make it a valuable linear lighting design tool that extends its use far beyond cove lighting.

Many traditionally high-performance specification features come as standard in the CoviO making it perfect for architectural specifications.

The proof is in the color

With a standard color rendering index of 90+CRI and standard CCT options of 2700K, 3000K, 3500K or 4000K the CoviO enhances architectural spaces.

Indoor / Outdoor Versatility

The CoviO is perfect for indoor and exterior locations allowing continuity in illumination from indoor to outdoor spaces. The integral silicone lens gasket delivers IP66 and UL wet location ratings for exterior installations.

High efficacy and lumen output

LED board is available in three lumen output options up to 1500 lm/ft and category leading efficacy up to 130 lm/W.

Self-closing end cap

The proprietary, self-closing end cap ensures a risk-free end-of-run even in a wet exterior locations.

Integral driver

An integral driver reduces installation costs without the hassle of finding remote driver locations.

Runs up to 300ft.

Designed for long runs from a single power drop to make installation easy and cost effective.

Wireless Dimming

Wireless dimming to 1% is available with the WaveLinx Wireless Connected Lighting System.

Quick connect System

Quick connects save time and money on installation costs with easy to install quick connects. Exterior (IP66) rated quick connectors easily snap together and enables runs of more than 300 ft from a single power drop.

CoviO – 2 ft.

CoviO – 1 ft.

The CoviO provides a sleek light source that doesn't need to be limited to coves. Here the CoviO provides indirect uplight from the support trusses and from the tops of the columns as well as direct light from the niches around the doors.

Designed for Versatility

The CoviO series offers the designer a flexible design tool to be utilized in many traditional cove installations, or in new applications even outside a cove. With a small footprint, an outdoor rating, three output options, four standard CCTs, dimming to 1%, 90 CRI standard and multiple dimming protocols, the application possibilities are wide open.

Uplight cove

Use the CoviO to fill a traditional cove with rich high quality light and accentuate high-end finishes.

Downlight Cove

CoviO creates indirect smooth even illuminance on an accent wall from above.

Floating Ceiling

Even illumination without socket shadows of the perimeter of an architectural element draws attention and creates a floating surface effect.

Designed for simple control

The CoviO is control agnostic, working seamlessly with standard 0-10V, ELV, Triac, DALI or WaveLinx. The luminaire also provides smooth digital dimming down to 1%. The proprietary integral driver in the CoviO is a 0-10V driver with standard dimming capability from 100% to 1%. The proprietary control module options enable compatibility with a wide variety of dimming protocols from the standard CoviO fixture with only a single control module per run. Control module options include ELV, Triac and DALI.

Wireless control is also available through the WaveLinx Wireless Connected Lighting System.

		Run Length Limits (ft)						
		1F=12"			2F=24"			
		05L (500lm)	10L (1000lm)	15L (1500lm)	05L (1000lm)	10L (2000lm)	15L (3000lm)	
		5.1W	9.9W	14.6W	9.9W	18.8W	28.9W	
Dimming Protocol	0-10V (STD) ELV (ELV) Triac (TR) WaveLinx (WL)	Maximum Run Length Limit (ft) @ 120V	140	70	50	140	70	50
		Maximum Run Length Limit (ft) @ 277V	300	170	120	340*	170	120
	DALI (5LT)	Maximum Run Length Limit (ft) @ 120V	92	47	32	92	48	32
		Maximum Run Length Limit (ft) @ 277V	216	110	76	216	110	76

* Note: Run must be limited to 300 fixtures when using both 1F and 2F fixtures in a single 05L run @ 277V

CoviO delivers functional cove lighting that can eliminate the need to additional fixtures in applications like this hospital corridor while also providing softer indirect ambient light like the coves over and under this nurse's station.
